

# A Long History of Success.

In 1965, MagX produced the first flexible magnetic sheeting ever made. To this day, MagX is still considered the global leader in flexible magnetic technology.

## XTRUmag Flexible Magnetic Sheeting

XTRUmag is a multi-purpose flexible magnetic product available in both 24.375" and 40" widths for signage, screen printing, digital imaging and advertising specialty.

## SOLVmag Flexible Magnetic Sheeting

SOLVmag has an exclusive direct digital print (DDP) laminate which is compatible with most U V flatbed and solvent based digital inkjet systems and is specially formulated to create photo quality images.

## INKJET PAPERmag Flexible Magnetic Sheeting

INKJET PAPERmag is made specifically for aqueous based inkjet printing and is specially formulated to create photo quality images.

## PITAEMON Flexible Magnetic Rolls & Sheets

PITAEMON (pronounced pee-tie-mon) is an incredibly unique, ultra thin, .006" flexible magnetic product. Available in rolls or sheets, PITAEMON is made specifically for inkjet and desktop printing.
